Notes: Standard errors in parentheses. Dependent variable: cumulative dark matter exports over 1980–2003, divided by 2003 GDP. This table is a robustness check, not the baseline replication. The augmented sample supplements missing IMF BOP income data with WDI national-accounts net income from abroad only for countries with observations in both 1980 and 2003. Recovered proxy countries: AUT, BFA, CIV, RWA. Variables are expressed as ratios where relevant and winsorised at the 1% level. * p<0.10, ** p<0.05, *** p<0.01.
