Notes: Standard errors in parentheses. Dependent variable: cumulative dark matter exports over 1980–2003, divided by 2003 GDP. Variables are expressed as ratios where relevant and winsorised at the 1% level. Columns (i)–(iii) use the H&S 79-country sample when data are available. Columns (iv)–(vi) use the H&S 99-country sample when data are available. Column (vii) uses the H&S industrial-country sample when data are available. The lower number of observations is due to missing historical BOP income data and, in columns with controls, limited WDI R&D coverage. * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$.
